President’s Message

Our December 15th membership meeting will feature The Honorable Gerry Connolly, Chairman of Fairfax County Board of Supervisors. The Federation will have its own “Ask the Chairman” show as Chairman Connolly will take questions from attendees. This promises to be informative as Fairfax County’s relationship with Richmond will be front and center with the county’s initiatives on transportation, education, land use and the budget.

The Federation’s November 17th meeting in Mount Vernon on Base Relocation and Closure (BRAC) was a huge success. Cosponsored with the Mount Vernon Council of Citizens Associations, over 70 attendees listened to presentations by Supervisor Gerry Hyland, Lee District School Board member Dan Storck and representatives from Fort Belvoir, the Virginia Department of Transportation and the Fairfax County Public Schools (FCPS). Answers to pertinent questions from the audience on the effects of BRAC on the county school and transportation infrastructures raised even more questions about the federal unfunded relocation mandate. The challenges of traffic and schools facing Fairfax County residents appear to be daunting if the six year BRAC schedule is kept without major investments by the federal government.

I am pleased to report my November 21st testimony and presentation of our Legislative Program was very well received by the Board of Supervisors. Several supervisors publicly complimented the program and our involvement. Sally Ormsby and Carol Hawn earn our appreciation for their highly respected work. Also, as Federation President, I was part of the Lee District Association of Civic Associations committee to determine the recipients of the Les Dorson Public Service Awards to be presented on December 13th.

There is more to come. Our January 19th membership meeting will feature FCPS Deputy Superintendent Brad Draeger with a discussion of the school budget and No Child Left Behind Act. At our February 16th meeting, The Honorable Penny Gross, Mason District Supervisor, will give a presentation on the Chesapeake Bay. Keep track of the Citizen of the Year Awards Banquet in March and other Federation matters at FairfaxFederation.org, thanks to Jeff Parnes our webmaster.

Finally, we are growing at the Federation. Increased membership and a full board enable us to place greater scrutiny on issues such as stream reclassification, school initiatives and budgets, land use zoning ordinance amendments and transportation, as well as improve our interrelationships with other umbrella regional associations. If you have volunteer time to give, come and be part of the Federation - just let me know.

Have Safe and Happy Holidays!

John Jennison, President

Airports Public Forums Scheduled
The Fairfax County Airports Advisory Committee (FCAAC) will sponsor two public forums to give residents the opportunity to comment on airport operations. The first is scheduled for Tuesday, December 13, 2005, beginning at 7:30 p.m. in the Board Auditorium of the Fairfax County Government Center, 12000 Government Center Parkway, Fairfax. The second is scheduled for Tuesday, January 17, 2005, at 7:30 p.m. at the South County Government Center, 8350 Richmond Highway, Alexandria. The forums are open to all county residents.

Residents will have the opportunity to address issues related to airport operations, including aircraft noise, safety, security, expansion, ground transportation, access, parking, airport terminal operations, or other services. The FCAAC will summarize all comments for later presentation to the Board of Supervisors.

The FCAAC is a citizens committee established by the Board of Supervisors to advise on issues concerning airport operations at Dulles International and Washington Reagan National Airports.

To register in advance to speak at, or for additional information on, the forums, or to send written comments, please contact Carol Hawn at (703) 266-6872 or via email at cahawn@att.net. Those registering in advance will be given ten minutes to testify; those signing up at the forum will be given up to five minutes.

If either Fairfax County Government or Public Schools are closed after 12:00 noon on the day of the scheduled forums, or if government or schools are closed the next day due to inclement weather, the forum will be rescheduled for a later date.

The Federation Board wishes you and yours all the best this holiday season, and peace in the new year.

Inclement Weather Policy
With the upcoming potential for inclement weather, the following policy is in effect: if either Fairfax County Government or Public Schools are closed after 12:00 noon the day of a Federation membership meeting, or if it is announced that Fairfax County Government or Schools will be closed the day after a scheduled Federation membership meeting due to inclement weather or other emergency, the Federation will not hold that meeting. This does not pertain to regularly scheduled closures, such as holidays. Membership meetings will not be rescheduled. We will make every attempt to post the cancellation on our website, www.fairfaxfederation.org. You can also contact (703) 266-6872 for more information.
Fairfax County Federation of Citizens Associations
Membership Meeting of November 17, 2005

DRAFT MINUTES
(for membership approval at the December 15, 2005 meeting)

This month's FCFCA meeting was devoted to one subject: the local and countywide impact of the large staffing increases at Fort Belvoir due to BRAC. The meeting was held at the Walt Whitman Middle School in the Mount Vernon District and was co-sponsored by the Mount Vernon Council of Citizens Associations (MVCCA). (Attendance list is attached to original copy.) Other customary business, such as approval of the minutes and the Treasurer's Report, was deferred to the December membership meeting. The meeting began at 7:30 p.m.

Program —

a. Federation President John Jennison and MVCCA Co-Chair Errol Bergsagel called the meeting to order.

President John Jennison thanked the MVCCA for co-sponsoring the event and thanked Supervisor Gerry Hyland and Federation First Vice President Patrick Rea for obtaining the meeting space and for organizing the event and the panel of speakers. He explained that the Federation represents citizens and homeowner associations throughout the county and introduced several of the Federation committee chairs, including Charles Dane (Education), Patrick Rea (Membership), Walt Sisson and Flint Webb (Environment), Steve DelBianco (Land Use), and Earl Flanagan and Roger Hoskins (Transportation), mentioning some of the issues now being reviewed, such as the School budget and stream re-classification. He noted that Carol Hawn, also chairman of Human Services, had Citizen of the Year nomination forms, also available on the Federation website (www.fairfaxfederation.org); the nomination deadline is January 15. Membership meetings are on the third Thursday of each month; the programs for the next three are Q & A with Chairman Connolly (December 15), Education and No Child Left Behind impact, with FCPS Deputy Superintendent Brad Draeger (January 19), and the Chesapeake Bay clean-up, with Supervisor Penny Gross (February 16).

MVCCA Co-Chair Errol Bergsagel noted that the council is an umbrella group for associations in the Mount Vernon District. It meets in the same space, the Jack Knowles Lecture Hall at Walt Whitman Middle School, the last Wednesday of each month. Its committees include Budget and Finance, Consumer Affairs, Education, Environment and Recreation, Health and Human Services, Affordable Housing, Planning and Zoning, Public Safety, and Transportation. Supervisor Gerry Hyland attends the meetings. Minutes, resolutions, schedules, and other materials are on the Council website, www.mvcca.org. He thanked the Federation for the opportunity to co-sponsor this important meeting.

b. John Jennison introduced the panel members: the Honorable Gerry Hyland, Supervisor of the Mount Vernon District; Leon Marshall, the BRAC Implementation Leader for Fort Belvoir; the Honorable Dan Storck, Mount Vernon School Board Member; Gary Chevalier, FCPS Assistant Superintendent; and Jan Vaughn, of VDOT's Arlington/Fairfax office.

c. Supervisor Hyland congratulated the Federation on co-sponsoring this meeting in the Mount Vernon District and expressed his thanks. He noted that both the county and the Army were very surprised by the large number of persons who will be based at Fort Belvoir. He said that planning for these changes was like trying to get your hands around jello. Initially the projected military and civilian increase in positions was 12,000, then 16,000, then 18,000. It is now 21,000. After the first announcement, he and the county staff immediately began speaking with Fort Belvoir's commandant on how to facilitate transportation of so many people in and out of the base. Transportation improvements are needed to make this work. At a bare minimum, back of the envelope estimate, these improvements would cost $350 million. Senator Warner has the list corresponding to this figure. BRAC won't work without such improvements and the financial help to make them happen. Under the BRAC law, there are just 6 years before all 21,000 people arrive.

In addition to financial help, the county needs assistance to learn the basic parameters quickly. First, where the 21,000 people will be located, either within Fort Belvoir or at the separate Engineering Proving Ground. (In response, Leon Marshall stated that a development consultant has been hired and will have a preliminary report by April.) Second, a survey of the personnel at the agencies being transferred, to include where they live now, whether they will move, and how many children they have at what ages. (Leon Marshall stated that a survey has gone out, but does not include questions about the children in this round.) While personnel will turn over, this is the best data we can get now.

d. Supervisor Hyland noted BRAC poses a special challenge to the southeastern county because i) Lorton/Newington/Laurel Hill is already the fastest growing part of the county, with 27,000 more persons projected in the next 5 years; ii) the BRAC realignment will bring with it defense contractors and their additional employees; iii) the National Museum for the U.S. Army on Fort Belvoir is projected to have 1 million visitors a year; and iv) the Lorton Arts Foundation will also attract traffic at Laurel Hill. He also later noted the projected redevelopment of Springfield Mall and of the nearby 100 acres of the GSA warehouse area. In 6 to 10 years, and realistically 6 rather than 10, there will be a new southeastern part of the county that we will not recognize. The county must be joined at the hip with the federal, state, local, and military leadership in making this happen and doing it right. He then asked Leon Marshall whether the $1 billion allocation for BRAC transportation improvements (nationwide) includes improvements off the base, or only on the base.

e. Leon Marshall said that no money from that fund is available off post. So far $30 million has been allocated on post for road widening, lights, and so on. He thanked the Federation, the MVCCA, and Supervisor Hyland for holding the meeting. He said that prior to the BRAC decision, which was unexpected, the fort had been planning for growth of 3,000 to 6,000 personnel. He also noted the personnel figures that BRAC used were from Fiscal Year 2003 and actual current levels at the agencies are higher; this accounts for the growth in the estimated net number of new personnel to 21,000. (There is actually a 23,000 increase coupled with a 2,000 decrease.) This September the fort began an implementation plan based on the BRAC recommendation. It calls for more than 3 billion dollars in construction costs for a total of 600 million square feet. This is the largest ever DOD BRAC initiative and requires resource assistance. An RFP has been issued for a master developer to create plans that will integrate Fort Belvoir and the surrounding community. A major aspect of this plan is where to correctly site facilities on Belvoir, which has not been determined, and may well include the Engineering Proving Ground, a great potential resource that has previously not been used.

Fort Belvoir outreach has included several meetings with local Chambers of Commerce and Rotary Clubs. Clearly transportation is the top issue. Funding for transportation will come after the Master Plan and the Environmental Impact Statement and will affect both Fairfax and Prince William counties. The Army will have to mitigate this.

A web-based zip code survey has gone out to the agencies being transferred. Some are classified and must survey their own employees and then report aggregate data back. Many could not or would not act until BRAC became law on November 9. This survey is transportation-related only. In the first week, there has already been a 10 percent response. (In response, Supervisor Hyland stated that for planning purposes, information is needed for every single person, not a statistical sample). The National Geospatial Agency, at 7700 employees, is the farthest away, in Bethesda, so the decisions of those employees are of

(Continued on page 4)
Part of the change will be a large new hospital. With the closure of Walter Reed, half the patient list will be reassigned here. An audience member said that some local veterans now going to West Virginia will almost certainly choose to go to this new hospital and add further to the patient load. Supervisor Hyland noted that the location of the hospital has major implications for traffic flow and trip generation, and that Fort Belvoir already has one of the largest PX/commissaries in the world. Leon Marshall stated that the hospital siting is at the top of the commandant’s list. It was later stated that the hospital is expected to generate hundreds of thousands of trips a year. However, many will not coincide with rush hour.

Under the law, the realignment must be complete in 6 years from the date the president approved the recommendation, so the deadline for completion of the entire BRAC process is September 15, 2011. All military construction should be complete by then. Personnel will transfer primarily in 2010 and 2011, although the first 7 people will come in 2007; all will be at Fort Belvoir by September 15, 2011. Under the current residential housing program, the fort is only allowed to supply 25 percent of the military housing need. Although the recently completed housing analysis will be redone, it probably will not change. Supervisor Hyland urged an increase from the 2000 units now planned to 4000 as a way of increasing affordable housing.

f. Members of the audience, including some Federation chairs and some members of the MVCCA, asked several questions at this point.

On the environment, one question was whether the preliminary BRAC information was included in the recent transportation conformity analysis. Mark Cannalli from the county transportation staff, who was in attendance, stated that the July analysis used a BRAC figure of 18,000 but may also have double-counted some people.

Most questions were on transportation. Mark Cannalli reiterated the need for hard data on where facilities will be and where people will be going, to assess options that include extensions of the Blue or Yellow Metrorail lines, Rex express bus services, and a revised TDM (traffic demand management) program to encourage carpooling and use of a base shuttle. Earl Flanagan asked whether VDOT has time to incorporate exits from the I-95 express lanes to the county parkway at Newington. Mark noted that VDOT has a short-term, medium, and long-term list for projects. The ramps from I-95 to the parkway are on the long-term list and are not currently funded. Jan Vaughn of VDOT noted that a decision about HOT lanes on I-95 is still pending, but expected next month.

In response to other questions, Mark Cannalli noted that currently 67 percent of personnel at Fort Belvoir live south and west of the base. He said that the planned section of Fairfax County Parkway through the Engineering Proving Ground was put on hold by VDOT in May 2005 due to contamination issues related to petroleum spills and underground pipes. It would have been complete by 2008 but is now unscheduled pending a resolution of the problem, though still funded. He also stated that the Route One/Telegraph Road connector is going forward without question and will not be affected by BRAC. Supervisor Hyland noted that this connector road, built in response to the September 11 road closures on the base, will be open to partial traffic in 2008 and complete in 2009. This timespan of eight years from need to completion is two more years than are available to complete the BRAC project.

There was much discussion about the difficulty of obtaining firm data on traffic and residential patterns in the very limited time remaining. Two factors are how many current personnel in the agencies scheduled to be relocated to Fort Belvoir. Supervisor Hyland noted that some decisions need to be made now based on zip codes of existing employees in agencies scheduled to be relocated to Fort Belvoir. He agreed such data will change as relocation occurs but is sufficiently accurate for preliminary planning of Fairfax County services. He requested such data.

MVCCA Co-Chair Errol Bergsagel raised two questions from the council: how to expedite “throughput” of traffic on Route One that is not going to the Fort, including encouraging this traffic to use I-95, and easing access to the fort by neighbors in the local zip code area, perhaps through a green id tag system.

On mass transit, Supervisor Hyland stated that rail has got to be brought to this part of the county or BRAC will not work, whether it’s Metrorail or light rail along Route One. The audience also raised the question of ferries on the Potomac to open up housing options in Maryland or downriver in Virginia. Leon Marshall stated there are several good locations at the fort for a landing. The problem in the past has been too limited demand for this service.

g. Some questions were also raised on education impacts. School Board Member Dan Storck stated that information is the top priority; the schools need data to anticipate where people are coming from and what capacity is needed where. Currently, elementary schools in the area are growing and at capacity, but there is some capacity at some middle and high schools. Once data is available, the schools can plan, but at least a 5-year head start is needed to do this right. Although countywide enrollment has recently declined slightly, this area does not share in that trend and is growing rapidly. There is also an issue with the accuracy of local enrollment projections, since South County High School, just built, has filled up much faster than expected. Use of limited school capacity outside the immediate district is unlikely to work well because of the problem of long bus rides and a desire for schools to be part of the local neighborhood. Lacking data so far, communities south of Fort Belvoir expect to be most heavily affected. Leon Marshall told Supervisor Hyland that data on school age children will be included in the next web-based survey of those affected by BRAC.

h. In a further discussion of the timeline, Leon Marshall explained that to get federal DOD base access funds, hard numbers are required. A study will be conducted next year that will lead to an application for these funds. Supervisor Hyland stated that according to the usual county process, it would take 10 to 12 years to complete the roads. He said that “someone has to be creative to make this work.” Private-public partnerships were discussed, as was the possibility of using old railbeds still on Fort Belvoir, which could be given tracks again.

i. Leon Marshall noted that this BRAC transition is unprecedented in scale, which is one reason we do not have good data from any similar action to guide us. Fort Belvoir’s only previous BRAC experience was to relocate 5,000 people from Cameron Station in Alexandria to Fort Belvoir. DOD has experience with large-scale closures and transfers between widely separated parts of the country, but not within the same region on this scale.

j. Federation President John Jennison thanked all the members of the panel and all those who attended. He appreciated the opportunity for all parties to assess the impact of BRAC on the region and the challenge to Fairfax County resources.

Next Federation Membership Meeting: December 15, 2005.

Next Federation Board Meeting: December 1, 2005.

Meeting adjourned at 10:00 p.m.
Federation Environment Committee Co-Chairs Meet with County Officials on Stream Reclassification Process

On October 25, 2005, Federation Board members met with Jimmie Jenkins, Director of the Fairfax County Department of Public Works and Environmental Services (DPWES) and other DPWES representatives to discuss the County’s proposed modifications to the stream reclassification process. Federation representatives were Walt Sisson, Flint Webb and Sally Ormsby. Providence District Supervisor Linda Smyth and Providence Planning Commissioner Ken Lawrence also attended.

The original process to classify streams as perennial was performed using a protocol that examined 26 hydrologic, physical and biological factors. This process was a tool that used indicators to classify streams based on a one-time visit; it was a predictive tool used in the absence of direct observation of water flow. The current provisions for reclassifying streams involve observation of flow during non-drought periods. Such observations take precedence over predictive classifications using the protocol.

The County has acknowledged that the criteria for stream reclassification need to be tightened. There needs to be uniformity regarding the use of the drought index; changes in the way a stream is observed, including methods used to determine flow between pools; expansion of public notification and comment procedures; and actions to ensure the Board of Supervisors is notified of reclassification requests.

DPWES is considering several changes in the reclassification process. First, observations of stream proposed for reclassification would not be conducted if the U.S. Drought Monitor Index indicated that conditions were D0 (Abnormally Dry) or higher. Current procedures allow for stream reclassification if observations of the absence of flow are made during ‘non-drought’ periods. In addition, local conditions and local monitoring station measures would be taken into consideration.

Another proposed change involves observation of stream flow 150 feet downstream of the property line of the property owner requesting the reclassification, and observation upstream along the entire length of the stream. In addition, the County will use dye tests and other appropriate methods to determine if there is flow between pools or flow below the surface.

The County is also considering changing the notification process of local citizens when a stream is proposed for reclassification. The County will notify all property owners adjacent to the property owner requesting the classification that a reclassification is being requested, as well as local community associations. However, the Federation requested that notification include all property owners whose property is upstream, as the reclassification would change the designation of the stream running through their property. Federation members were also concerned that because not all homeowners associations are incorporated, the County may fail to notify some affected associations. The County agreed to reexamine this process.

Finally, DPWES will take steps to ensure the Supervisor whose district includes a stream proposed for reclassification is notified prior to any County action (i.e., observation by officials). The full Board of Supervisors will also be notified of any proposed stream reclassifications; however, the decision to reclassify a stream will remain an administrative decision and not a Board decision.

The Environment and Land Use Committees will continue to work with citizens and County officials to ensure the stream reclassification process remains open and grounded in scientific methods.

Air Quality State Implementation Plan Process on Federation Website

Environment Committee Co-Chair Flint Webb has written an article on the Washington Metropolitan State Implementation Plan (SIP) development process. Because of its length, it cannot be published in this edition of the newsletter but is available on the Federation website, www.fairfaxfederation.org. If you would like to obtain a copy and cannot access the website, please contact Carol Hawn at (703) 266-6872. I invite you to read it; if you have any questions, please contact Flint Webb at (703) 560-5203 or FedEnvironment@fairfaxfederation.org.

County Releases Winter Preparedness Information to Keep Residents Safe this Season

Between the upcoming holiday season and the onset of colder weather, candles are often lit during the winter. The National Fire Protection Association reports that Christmas Day was the peak day of the year for home candle fires between 1999 - 2002, with New Year’s Day and Christmas Eve tied for second. If you elect to use open-flame candles, the following safety measures are recommended:

• Do not place candles near combustible materials such as upholstered furniture.
• Never leave children unattended in a room with an open flame.
• Do not place candles on window ledges or near entryways - the potential air draft can “fan” the flame, catching curtains or other materials on fire.
• Keep burning candles within sight at all times. Candles can present fire hazard outdoors on decks and patios as well as inside the home.
• Always extinguish candles before leaving the home.
• Use holders designed for the particular candle style.
• Place all candles on a protected, heat-resistant, dry surface away from anything that can catch fire and out of the reach of children and pets.

On a related matter, because of the chance of power being knocked out during a winter storm, residents should assemble a home emergency supply kit. For more information on this, visit www.fairfaxcountycommunitycorps.org.

These and many other recommendations for staying safe during cold weather season are available on the Fairfax County website, www.fairfaxcounty.gov. To request this information in another format, please call (703) 324-3187.

December 2005 THE BULLETIN 5
Fairfax County
FEDERATION
of Citizens Associations

4022 Hummer Road
Annandale, VA  22003

Membership Meeting
Thursday, December 15, 2005
7:30 p.m.

Packard Center
4022 Hummer Road
Annandale

“Ask the Chairman”
with
The Honorable Gerald E. Connolly
Chairman,
Fairfax County Board of Supervisors

Directions to the Packard Center, located in Annandale Community Park
Take I-495 (Capital Beltway) to Little River Turnpike (Route 236 - Exit 52B); go east toward Annandale.
Turn left at the first stop light onto Hummer Road.
Go 200 yards to the entrance of Annandale Community Park, which is on the left.
Keep right to the large parking lot.
Please use the left entrance into the Packard Center.

Citizen of the Year Nominations
Nominations are still being accepted for the Fairfax County Federation of Citizens Associations/Washington Post Citizen of the Year Award. A nomination form is available on our website, www.fairfaxfederation.org.
If you know an individual whose contributions and accomplishments have benefited the residents of Fairfax County, we invite you to nominate them for this prestigious commendation. The deadline for nominations is January 15, 2006. If you have questions, or for additional information, contact Carol Hawn, Award Selection Committee Chair, at (703) 266-6872. The banquet will be held in March, 2006.

www.fairfaxfederation.org
